# Predicting Airbnb Prices Natural Chan

## Design

Purpose:

Holiday Weekend in San Francisco

- Goal:
  - Predict how much a listing should go for
  - Predict how much an individual should expect to spend on their stay

#### Data

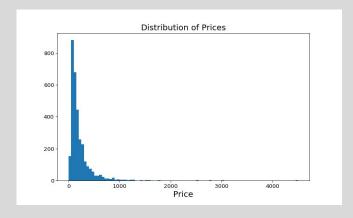

- Scrape a list of zip codes within 20 miles
- Use these zip codes to create a list of queries
- Search each query on Airbnb and gather as much information as we can on each listing

- Over 20000 listings
- 13 features

# Data Preprocessing and Analysis

- Removed duplicate listings
- Removed erroneous observations
- Encoded categorical features
- Removed features an individual would not have

## Base Model

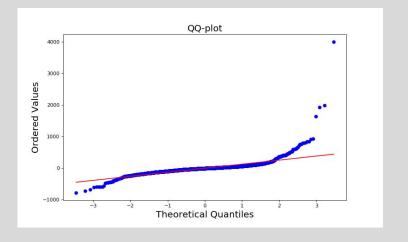

#### OLS with all 209 features

• **Adj. R2**: 0.569

• **Test R2**: -1.97e19

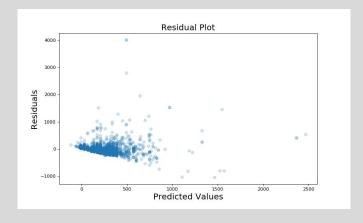

#### Feature Selection

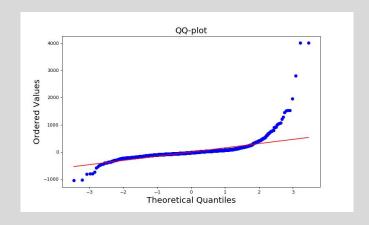

OLS after removing any features with low significance or causing multicollinearity

Down to 47 features

• **Adj. R2**: 0.446

• **Test R2**: 0.374

# Regularization

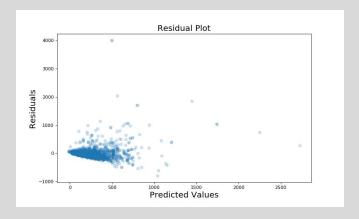

#### Elastic Net with remaining 47 features

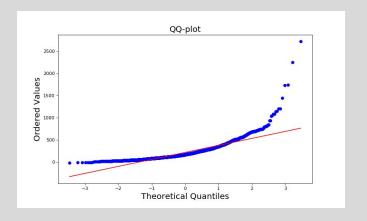

• **Adj. R2**: 0.487

• **Test R2**: 0.492

• **alpha**: 0.406

• **L1 Ratio**: 0.1

## Transformation

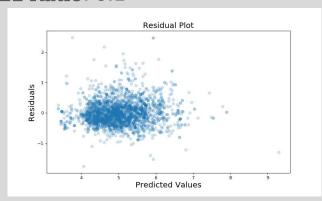

Elastic Net with a log transformation on the target variable

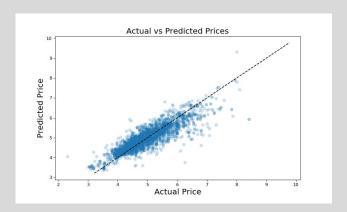

• **Adj. R2**: 0.734

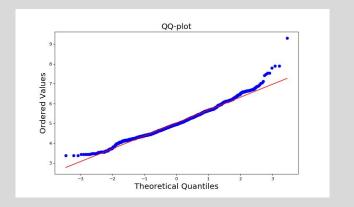

• **Test R2**: 0.716

• **alpha**: 0.038

• **L1 Ratio**: 0.1

#### Results

#### Variables with Increase in Price

- # of Guests: 17.17%
- # of Bedrooms: 12.16%
- # of Bathrooms: 11.34%
- Fisherman's Wharf: 8.16%
- Entire Residential Home: 7.63%
- Western Addition/NOPA: 7.43%
- Marina: 7.00%
- Chinatown: 6.77%

#### Variables with Decrease in Price

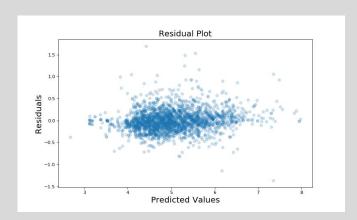

- Private Room: -14.93%
- Shared Room: -13.43%
- Hostel Beds: -8.00%
- Shared Baths: -5.76%
- Oakland: -5.18%
- Daly City: -4.04%
- Elmhurst: -3.71%
- South San Francisco: -3.33%

## **XGBoost**

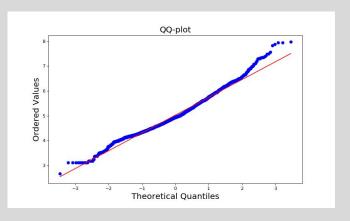

XGBoost to see if we can further improve on our results

• **Adj. R2**: 0.940

• **Test R2**: 0.780

#### **Future Work**

- Use listing location to create new features such as tourist attractions within the vicinity
- Observe more dates to see effect on price
- Gather data on hotels and create a separate model for comparison
- Hypertune our parameters for XGB by using cross validation
